

### ABSTRACT

A network system according to the present invention has portable terminals (10<sub>1</sub>, 10<sub>2</sub>) connectable to a network, a distribution server (4) for distributing video and/or audio data to the portable terminals (10<sub>1</sub>, 10<sub>2</sub>) through the network, and a storage server (5) for storing a message of video and/or audio contents when the message is sent from the portable terminals (10<sub>1</sub>, 10<sub>2</sub>) to the network in response to the data distributed from the distribution server (4).
